

DiamondClear Polycarbonate Finished Transitions® Lenses Now with Surpass® ECP AR

New in Stock!

Transitions® VI
ADVANCED PERFORMANCE
FOR HEALTHY SIGHT

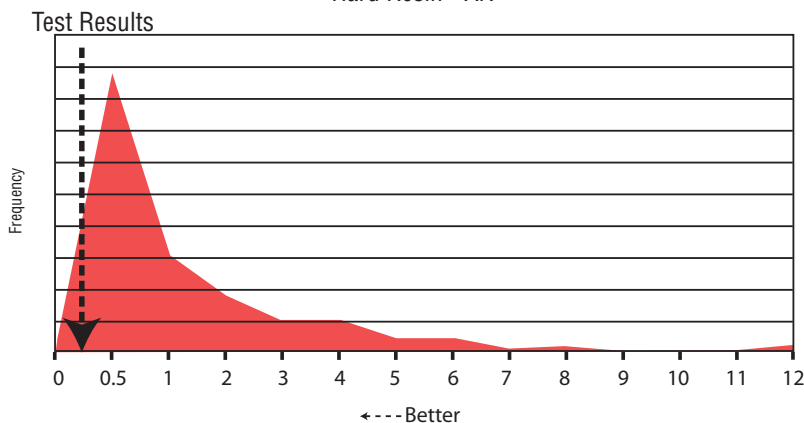

DiamondClear polycarbonate finished single-vision Transitions® lenses are now in stock, with factory applied Surpass AR with EasyClean Plus super hydro topcoat. Transitions VI lenses are darker outdoors than previous Transitions lenses, darker outdoors in hot temperatures, clearer indoors, and they fade back faster than ever. They also provide UV 400 protection.

Surpass AR with EasyClean Plus protective topcoating combines hydrophobic and oleophobic chemistry to provide ultra-high coating surface tension. The result is a lens that is extraordinarily easy to clean. Engineered for the best overall durability, Pentax Surpass AR with ECP repels water, oils and grime, while preventing deterioration due to UV, humidity and normal temperature fluctuations.

Specifications

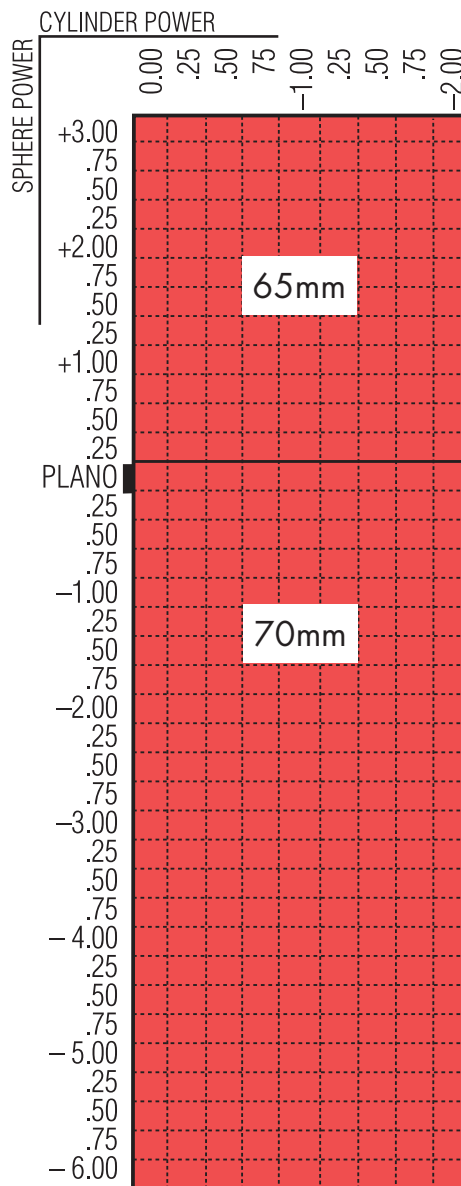

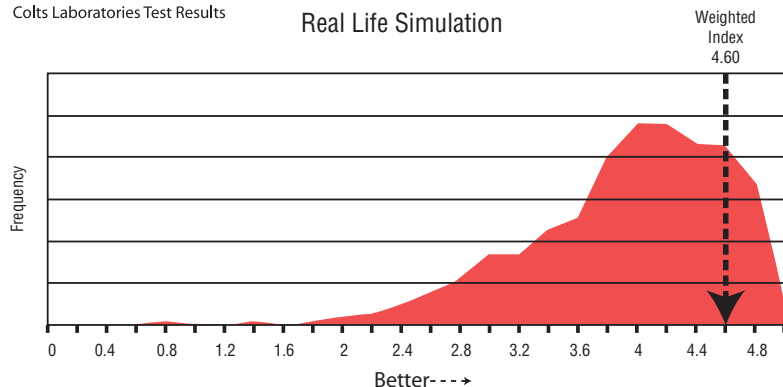

- Material:** Polycarbonate
- Design:** Aspheric
- Refractive Index:** 1.59
- Specific Gravity:** 1.20 g/cm³
- UV Cutoff:** 400nm
- Abbe Value:** 31
- Coatings:** Transitions VI photochromic
